

# Stormwater Solutions Garden Tour

See how neighbors are reducing run off into Cabin John Creek through Rain Barrels, Permeable Driveways, and Rain Gardens.

Thinking of making your yard more watershed-friendly? See what can you do at home to improve the quality of our local waterways — all the way to the Chesapeake Bay. Take a self-guided tour of **RainScapes** projects in our area. **RainScapes** are areas of your yard that capture and filter rainwater, which helps keep pollutants out of streams and creeks. Montgomery County has **RainScapes Rewards** program to help you plan your own **RainScapes** project and defray the costs. Join us to learn all about RainScapes and what you can do to help keep your watershed clean. Find out more at:

[www.montgomerycountymd.gov/water/rainscapes/](http://www.montgomerycountymd.gov/water/rainscapes/)

- 1 **8115 Lilly Stone Drive**  
RainScapes Demonstration Project
- 2 **8216 Lilly Stone Drive**  
Conservation Garden
- 3 **8015 Glenmore Spring Road**  
Permeable Pavement

*We thank the homeowners who have welcomed us to their properties, as well as you, for taking time to learn more about these simple, effective and beautiful solutions. Together, we can make a difference in the quality of life in Montgomery County, now and for generations to come.*

Funding for this Watershed Restoration and Outreach grant project was provided by Montgomery County, MD Water Quality Protection Charge and managed by the Chesapeake Bay Trust.
